Mollie Harreys - Abstract for Final Project

I have chosen to do, Final Project Option 1 - Google Doodle.

I want to do technological devices that have had a major impact on history. This historical device is, historically, very recent but I feel it is a good thing to focus on. I want my google doodle to be focused on 3D printing. Possibly I might put the "google" inside a 3d Printer or just show the nozzle move and print it. Clicking on the printed google will change its color. It will start off half-printed so google is still legible before hovering over it.

whole thing or Just nozzle

3d printing "Google"

3D supports

Click on google to change color
